

AGD-200 DG

WIRELESS GLASS BREAK DETECTOR

The **AGD-200 DG** detector is designed to detect the breaking of panes of regular, tempered and laminated glass. For detection, it uses advanced dual-path signal analysis. Sensitivity of its built-in microphone can be adjusted. The device works as part of the **ABAX 2/ABAX** two-way wireless system.

Configuration of **AGD-200 DG** and updating of its firmware are carried out remotely. Radio communication in the **ABAX 2** system is AES encrypted.

The detector is characterized by low energy consumption. It is powered by a CR123A 3 V lithium battery, whose status is constantly monitored. The "ECO" option (available in **ABAX 2**)

The device is provided with a LED indicator of violations in the test mode, etc. Additionally, it comes with tamper protection against opening of the enclosure and removal from the mount.

The detector is available in white (**AGD-200**), brown (**AGD-200 BR**) and dark gray (**AGD-200 DG**).
