

ASP-215 R

INDOOR WIRELESS ACOUSTIC–OPTICAL SIREN

ASP-215 R is a siren that informs you about alarm situations by means of acoustic and optical signaling. It operates as part of the **ABAX 2/ABAX** two-way wireless system. The device complies with the EN 50131 Grade 2 requirements.

The acoustic signal is generated by a piezoelectric transducer (3 tones to choose from), and the optical signal is provided by LED indicators. Both signals can be triggered independently.

Configuration and updating of the firmware can be carried out remotely. Communication in the **ABAX 2** system is AES encrypted.

The device is characterized by low energy consumption. It is powered by a CR123A 3 V battery. Its status is constantly monitored. Additionally, the "ECO" option (in **ABAX 2** only) extends the device operation time even fourfold.

ASP-215 has tamper protection against opening and removal from the mount. Its enclosure is made of high impact polycarbonate, with very high mechanical strength.

The siren is available in three color versions: red (**ASP-215 R**), blue (**ASP-215 BL**) and orange (**ASP-215 O**).
